

ENDURA™ EQUIPPED

TURNKEY SERVICE & SUPPORT TRUCKS

TIPPERS | TRANSPORTERS | TRAILERS

About us

Our team prioritise our customers first, always. We are completely immersed in the industry, with a vested interest in innovating the best solutions for our customers to succeed.

Endura Equipped have a proven track record of successfully building turnkey service trucks since 2008 for civil, utilities, construction, service, dealer and agricultural industries.

We provide the highest quality equipment with NZ-based aftersales support to help you achieve low downtime, along with flexibility to get you into the equipment you need, including hire, lease, hire purchase & outright purchase.

IT'S OUR MISSION TO EQUIP CUSTOMERS WITH SERVICE TRUCK SOLUTIONS THAT ENABLE THEM TO MAINTAIN INFRASTRUCTURE WITHIN THE COMMUNITY.

Our Turnkey Build Process

From consultation through to delivery, we will build you a custom, fit-for-purpose truck to meet your working needs.

1. CLIENT CONSULTATION

We undergo a briefing to understand your specific requirements of the equipment. Our NZ-based team of design engineers then carefully and efficiently plan out your build, from selecting the appropriate truck through to building out your requirements. We commit to a time frame and budget so that you are assured of what to expect.

2. DESIGN

We use the latest software to design your turnkey build with all the elements you require, ensuring it performs optimally and meets the specific needs of its intended use now and for future growth expectations.

3. PLANNING & PROJECT MANAGEMENT

By investing time and effort into thorough planning before starting the build, we can deliver the optimal truck for your requirements, that is functional, safe and cost-effective.

4. ASSEMBLY

Our team of certified engineers carefully assemble each component of the build ensuring its fitted and tested to meet all necessary safety, compliance and quality standards. Our team prioritise optimising vehicle service life.

5. DELIVERY

We deliver the finished product, a fit for purpose turnkey truck on time and in budget, that immediately gets to work in your business.

Why Turnkey?

A 'turnkey' design and build means we take total responsibility for all elements of a unique build. From ordering the truck, organising the build up, through to delivering a fit for purpose specialist truck that immediately gets to work in your business.

This process involves many years' experience in weight ratios, stability, certification, compliance and actual hands on knowledge of how these specialist trucks are used in the field and the ergonomics involved in a build.

Why trust us with your Turnkey Build?

Endura Equipped is dedicated to providing reliable truck solutions, that enable our clients to maintain infrastructure within the community.

01

INDUSTRY EXPERIENCE

With more than 15 years of experience, we know the build requirements of the industries we are working in. We know the importance of having the right equipment for the job, which has influenced our well thought-out & proven designs.

02

WE MAKE IT AVAILABLE

With our tried & tested turnkey business model, we are able to guarantee your build cost & delivery date so you can confidently plan ahead with the peace of mind you won't be exposed to unforeseen costs and delays.

03

PRODUCT DEVELOPMENT

We understand the increased demand for lightweight, efficient & safe vehicles. This is why we are constantly innovating based on these key areas along with customer feedback and the evolving industry needs including reducing vehicle emissions.

04

PROJECT MANAGEMENT

Through years of building quality turnkey vehicles we have learnt the importance of seamless project management. We provide our customers with a structured and transparent approach to managing their build requirements. This ensures that the project is completed on time, within budget, and to the required quality & spec, which benefits the customer by enabling them to focus on the job at hand.

05

WORK READY SOLUTIONS

We take care of all elements of your build such as, assembly, compliance & design. This provides significant benefits to our customers by saving time and costs, reducing risk, improving usability, and providing access to industry best practices. This can lead to improved efficiency, productivity, and profitability, making it an attractive option for many businesses.

06

SERVICE SOLUTIONS

Due to the vast amount of experience & industry knowledge, we can help customers in many ways by fostering innovation, enhancing the customer experience, providing greater choice and flexibility, offering access to expertise and resources, and lowering costs. By collaborating with other likeminded companies and organizations, this enables us to create more value for our customers and build a stronger competitive advantage.

Our Turnkey Build Packages

Our service and support trucks including transporters, small tippers, trailer mounted crane and small crane trucks are designed to conduct specific maintenance tasks, field service or to act in support of other specialist trucks.
