

ENDURA™ EQUIPPED

TURNKEY UTILITY MAINTENANCE TRUCKS

EQUIPPED TO PERFORM

About Us

Our team prioritise our customers first, always. We are completely immersed in the industry, with a vested interest in innovating the best solutions for our customers to succeed.

Endura Equipped have a proven track record of successfully building turnkey service trucks since 2008 for councils, civil, utilities, construction, service, dealer and agricultural industries.

We provide the highest quality equipment with NZ-based aftersales support to help you achieve low downtime, along with flexibility to get you into the equipment you need, including hire, lease, hire purchase & outright purchase.

We are specialists in light maintenance trucks tailored for various sectors including:

- Parks & reserves
- Rubbish collection
- Grounds maintenance
- Water utility
- Urban community maintenance
- Roothing

**IT'S OUR MISSION TO EQUIP CUSTOMERS WITH SERVICE
TRUCK SOLUTIONS THAT ENABLE THEM TO MAINTAIN
INFRASTRUCTURE WITHIN THE COMMUNITY.**

Our Turnkey Build Process

From consultation through to delivery, we will build you a custom, fit-for-purpose truck to meet your working needs.

1. CLIENT CONSULTATION

We undergo a briefing to understand your specific requirements of the equipment. Our NZ-based team of design engineers then carefully and efficiently plan out your build, from selecting the appropriate truck through to building out your requirements. We commit to a time frame and budget so that you are assured of what to expect.

2. DESIGN

We use the latest software to design your turnkey build with all the elements you require, ensuring it performs optimally and meets the specific needs of its intended use now and for future growth expectations.

3. PLANNING & PROJECT MANAGEMENT

By investing time and effort into thorough planning before starting the build, we can deliver the optimal truck for your requirements, that is functional, safe and cost-effective.

4. ASSEMBLY

Our team of certified engineers carefully assemble each component of the build ensuring its fitted and tested to meet all necessary safety, compliance and quality standards. Our team prioritise optimising vehicle service life.

5. DELIVERY

We deliver the finished product, a fit for purpose turnkey truck on time and in budget, that immediately gets to work in your business.

Why Turnkey?

A 'turnkey' design and build means we take total responsibility for all elements of a unique build. From ordering the truck, organising the build up, through to delivering a fit for purpose specialist truck that immediately gets to work in your business.

This process involves many years' experience in weight ratios, stability, certification, compliance and actual hands on knowledge of how these specialist trucks are used in the field and the ergonomics involved in a build.

See website for more info:

Why Trust Us with Your Turnkey Build?

Endura Equipped is dedicated to providing reliable truck solutions, that enable our clients to maintain infrastructure within the community.

01

INDUSTRY EXPERIENCE

With more than 15 years of experience, we know the build requirements of the industries we are working in. We know the importance of having the right equipment for the job, which has influenced our well thought-out & proven designs.

02

WE MAKE IT AVAILABLE

With our tried & tested turnkey business model, we are able to guarantee your build cost & delivery date so you can confidently plan ahead with the peace of mind you won't be exposed to unforeseen costs and delays.

03

PRODUCT DEVELOPMENT

We understand the increased demand for lightweight, efficient & safe vehicles. This is why we are constantly innovating based on these key areas along with customer feedback and the evolving industry needs including reducing vehicle emissions.

04

PROJECT MANAGEMENT

Through years of building quality turnkey vehicles we have learnt the importance of seamless project management. We provide our customers with a structured and transparent approach to managing their build requirements. This ensures that the project is completed on time, within budget, and to the required quality & spec, which benefits the customer by enabling them to focus on the job at hand.

05

WORK READY SOLUTIONS

We take care of all elements of your build such as, assembly, compliance & design. This provides significant benefits to our customers by saving time and costs, reducing risk, improving usability, and providing access to industry best practices. This can lead to improved efficiency, productivity, and profitability, making it an attractive option for many businesses.

06

SERVICE SOLUTIONS

Due to the vast amount of experience & industry knowledge, we can help customers in many ways by fostering innovation, enhancing the customer experience, providing greater choice and flexibility, offering access to expertise and resources, and lowering costs. By collaborating with other likeminded companies and organizations, this enables us to create more value for our customers and build a stronger competitive advantage.

Our Turnkey Build Packages

TURNKEY PACKAGE OPTIONS

Service & Support Trucks

Toolbox Tipper Trucks

Trailers

Transport Trucks

Utes

Service & Support Trucks

Service Truck with PK17 Crane on Isuzu FTR750

This crane truck is purpose-built for demanding urban environments where tight spaces and challenging delivery locations are the norm. Its compact deck and powerful rear-mounted Palfinger PK17 crane offer unmatched versatility. The short wheelbase provides a tight turning radius for exceptional maneuverability, while the crane's 6,200 kg lifting capacity and 19-meter reach ensure effortless handling of heavy loads, all controlled via a handheld radio remote.

Key Features

- Access steps and grab handles for safety
- Headboard
- Certified rope rails and chain slots for secure load handling
- Underdeck toolboxes for added storage
- Robust design built to tackle any urban delivery challenge

Service Truck with Quicklift® Compact Crane on Hino 300

This service body design is compact & versatile, the perfect addition to your service fleet.

Key Features

Behind-Cab Toolbox

- Centre divider
- Interior lighting
- Rubber matting
- Roller doors

Deck

- Tough ply decking
- Aluminum or painted steel drop sides
- Certified rope rails
- Flush-mounted internal load anchor tie-downs

Quicklift® 250 Compact Crane

- Hydraulic winch
- Three hydraulic extension cylinders
- Hydraulic Stabiliser legs
- Handheld radio remote control for easy crane operation

Additional Features

- Towbar
- Grab handles
- Work lights
- Flashing lights
- Wheel chocks with holders
- Stabiliser pads with holders

Toolbox Tipper Trucks

Toolbox Tipper on Isuzu

With years of listening to our customers, we've engineered a smartly designed toolbox tipper deck for maximum efficiency, enabling us to streamline costs and accelerate delivery times. For our clients, this means a turnkey build that's immediately ready to get to work in the field.

Key Features

- Behind-cab toolbox
- 3 easily adjustable shelves
- Interior lighting
- Roller doors

Deck

- Grab handles & access steps
- Certified rope rails
- Quick tarp system
- LED work lights
- Small lift crane
- Tow bar

Horticulture/ Arboriculture Toolbox Tipper on Hino Hybrid 300

The pinnacle of innovative design and engineering, this state-of-the-art solution has been meticulously crafted to meet the unique demands of the industry, combining advanced features with unparalleled functionality. Every aspect of the deck has been optimised through extensive research and feedback, ensuring it not only meets but exceeds industry standards for efficiency, durability, and performance.

Behind-Cab Toolbox

- 2-3 easily adjustable shelves featuring rubber matting
- Interior lighting
- Roller doors

Deck

- 800mm dual split drop sides
- 800mm high tailgate (alloy/painted steel)
- Retractable mesh tarp
- Hydraulic hoist

Additional Features

- Grab handles
- Side and rear access steps
- Certified rope rails
- Internal load anchor points
- LED work lights
- Internal partition divider
- Tow bar

Urban Maintenance Waste Collection Fit Out on Hino

This urban maintenance waste collection fitout, is built on a Hino Hybrid cab chassis, reducing emissions, offering up to 30% fuel savings, and supporting sustainability goals. Innovatively designed for functionality and versatility. This fit-out is a sustainable and practical solution for urban maintenance and rubbish collection, combining modern technology with robust design.

Key Features

- Behind-cab toolbox
- 3 easily adjustable shelves
- Interior lighting
- Roller doors

Deck

- Grab handles & access steps
- Certified rope rails
- Quick tarp system
- LED work lights
- Small lift crane
- Tow bar

Trailers

Trailer with Quicklift® Compact Crane

This versatile trailer is a game-changer for your business, offering seamless functionality and smart design. Making it the perfect solution for efficient and reliable load handling.

Quicklift® 350 Compact Crane

- An electric start petrol powerpack
- Stabiliser legs
- Radio remote control, it can operate as a fully independent unit.

Additional Features

- Hydraulic override braking system
- Spacious clear deck
- Certified rope rails
- Multiple tie points

Transport Trucks

Transporter Truck

This compact build is designed to handle heavy machinery with ease, offering impressive payload capacity and everything you need to get the job done efficiently.

Key Features

- Access steps
- Grab handles
- Hydraulic ramps
- A hydraulic winch mounted at the headboard
- LED work lights
- Certified tie-down points

The robust deck ensures safe and reliable transport of heavy loads. Whether you're moving machinery to or from the site, we've got you covered.

4x4 Service Ute Fit-Out with Quicklift® Compact Crane

This utility vehicle has been carefully designed to include all the essential tools you need to get the job done. Whether you're working in the water utilities, Urban maintenance or power sector, this ute offers a one-stop solution. With everything you need onboard, there's no need to look any further!

Key Features

Large Duravault Gullwing Toolbox

- Drawer set
- Shelves
- Inverter (remove for ultimate functionality and organised storage)

Quicklift® 150 Compact Crane

- Hydraulic winch
- Radio remote control (operation for seamless lifting tasks in the field)

Additional Features

- Ladder Rack: Designed for secure and convenient transportation of ladders and essential equipment.
- Hydraulic Stabiliser Leg (Ensures stability during crane operations, complete with a stabiliser pad for added safety)
- 100L Water Tank (Paired with a powerful waterblaster to tackle tough cleaning tasks with ease)
- Enhanced Safety and Visibility (Includes a roof beacon, front and rear flashers, and rear-facing work/night lights for superior safety and efficiency in low-light or high-traffic environments)

Built for Reliability This vehicle is purpose-built to perform in demanding environments, offering unparalleled functionality and performance for industry professionals.

Urban Maintenance Ute Fit Out

Designed to thrive in the fast-paced demands of inner-city maintenance, this 4x4 Ute fit-out is perfect for rubbish collection and other urban tasks. Whether you're navigating crowded city streets, busy highways, or venturing off-road, this setup offers versatility and efficiency.

Key Features

- Large lightweight cage with a hydraulic tipping deck
- Dual barn-style rear doors
- Spacious behind-cab toolbox
- Work lights for enhanced visibility and more

4x4 Service Ute Fit-Out with Quicklift® Compact Crane

This 4x4 Ute fit-out is built for limitless versatility, whether you're navigating highways, city streets, or tackling rough off-road terrain. Designed for quick setup and safe operation, it's ideal for tight urban spaces or challenging field conditions.

Key Features

- Lightweight Quicklift® compact crane with a hydraulic winch
- Two spacious duravault toolboxes
- Underdeck storage
- A heavy-duty vice
- Hydraulic stabiliser legs
- Powerful work lights
